

ABOUT SAVING ENERGY

We use energy every day. Every time we switch on a light or turn on the TV, we use energy. Just about every room in your house or school has at least one product that uses energy. We're using more energy than ever.

LIGHTS

TELEVISIONS

COMPUTERS

PHONE CHARGERS

GAMING SYSTEMS

HEATING

HOW CAN YOU SAVE ENERGY?

TURN OFF THE LIGHTS WHEN YOU LEAVE A ROOM.

UNPLUG ELECTRONICS WHEN THEY ARE FULLY CHARGED.

TURN DOWN THE HEAT BEFORE YOU GO TO BED.

Choose ENERGY STAR products, like TVs and refrigerators, because they work just as well as other products, but use less energy!

TVS AND COMPUTERS

DISHWASHERS, WASHERS AND REFRIGERATORS
